

# Love?

All music, lyrics, artwork, performance and production by Martin Flett

Recorded at Church Hill, Leamington Spa and Piccadilly, Nottingham

With special thanks to:  
Peter Flett and Rich Bee  
for listening and offering support, both  
during the recording process and  
throughout the stuff the songs came from.  
(Although, apparently,  
I owe it all to my mother!)  
Love exemplified.

Christmas bonus track: When angels sing.  
Because sometimes in life  
there are angels we don't recognise.  
Things aren't always as they seem.

All music, lyrics and associated artwork

1. I want to be an astronaut
  2. Would it be okay?
  3. If I could know the future
  4. You were the one (Every day)
  5. Every day's a Monday (now you're gone)
  6. Someone else's girlfriend
- Christmas bonus track: 7. When angels sing
8. 30
  9. High and dry
  10. Falling
  11. Here we are
  12. Find a way

© Martin Flett 2012

"Love: it's all around; it's all you need;  
it will tear us apart.

In life there are many things we love:  
families, girlfriends/boyfriends, events,  
pets, pastimes... 'I love it' we cry.

And often we do - cry - because of  
love.

Love can sneak up on us, lift us higher  
than we've ever been before - or  
maybe ever will again - and bring us  
joy unimaginable. And sometimes we  
can fall from those heights to equal - or  
perhaps even greater - depths, just as  
quickly as we fell 'in love'.

Laugh

But what is life without love? This  
time of ours, marked out by birthday  
milestones - 30 years can pass by in a  
flash, and we bear the scars of loves  
found, lost...papered over.

Love can be unrequited (is there  
anything more painful?) or rejected; it  
can be risky and reckless, or perhaps  
real and rooted.

Love can lead us to so much: a new  
relationship, a new passion, a life of  
companionship, or a cherished memory.  
A 'labour of love' could lead to a PhD, a  
novel, or even a new album.

You never know what the future might  
bring if we just 'love'." - Martin Flett
